

# ASF situation in Thailand

Department of Livestock Development,  
Thailand

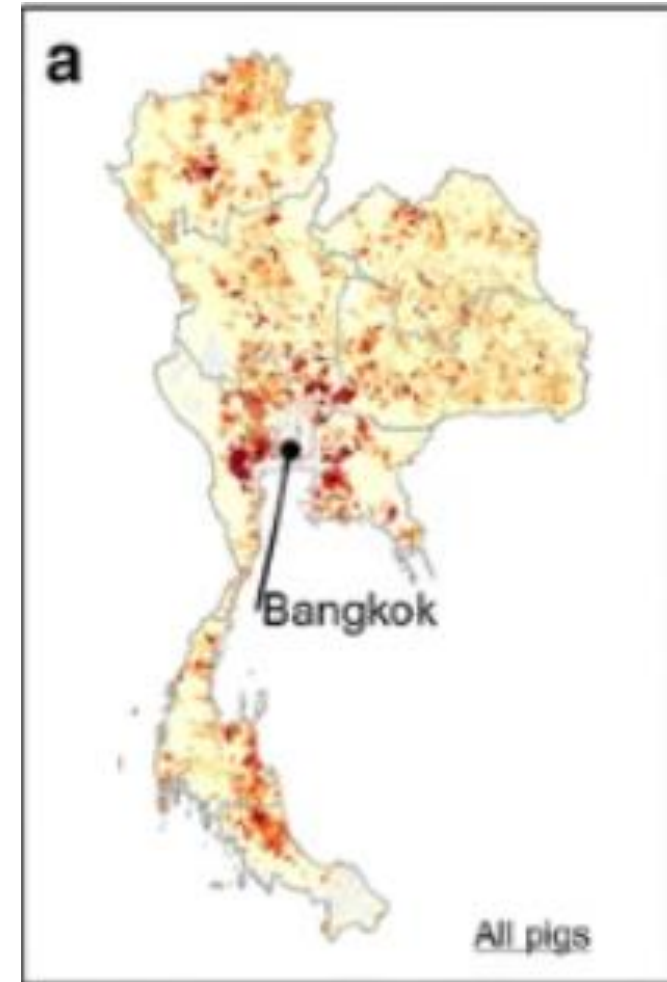

**OIE ASF regional risk assessment project**

23 October 2020

# Pig production and distribution

Groups	Sub-groups	Total number	
		Head	Farm
Pig types	All pigs	8,346,614	199,992
	Native pigs	681,463	95,328
	Breeding pigs	2,517,651	83,502
	Fattening pigs	5,147,500	56,884
Farming systems*	Farrow-to-finish	2,074,423	3731
	Nursery	590,136	6119
	Finishing	3,063,122	34,942

**Data: 2010**

# ASF contingency and preparedness plan : 8 measures

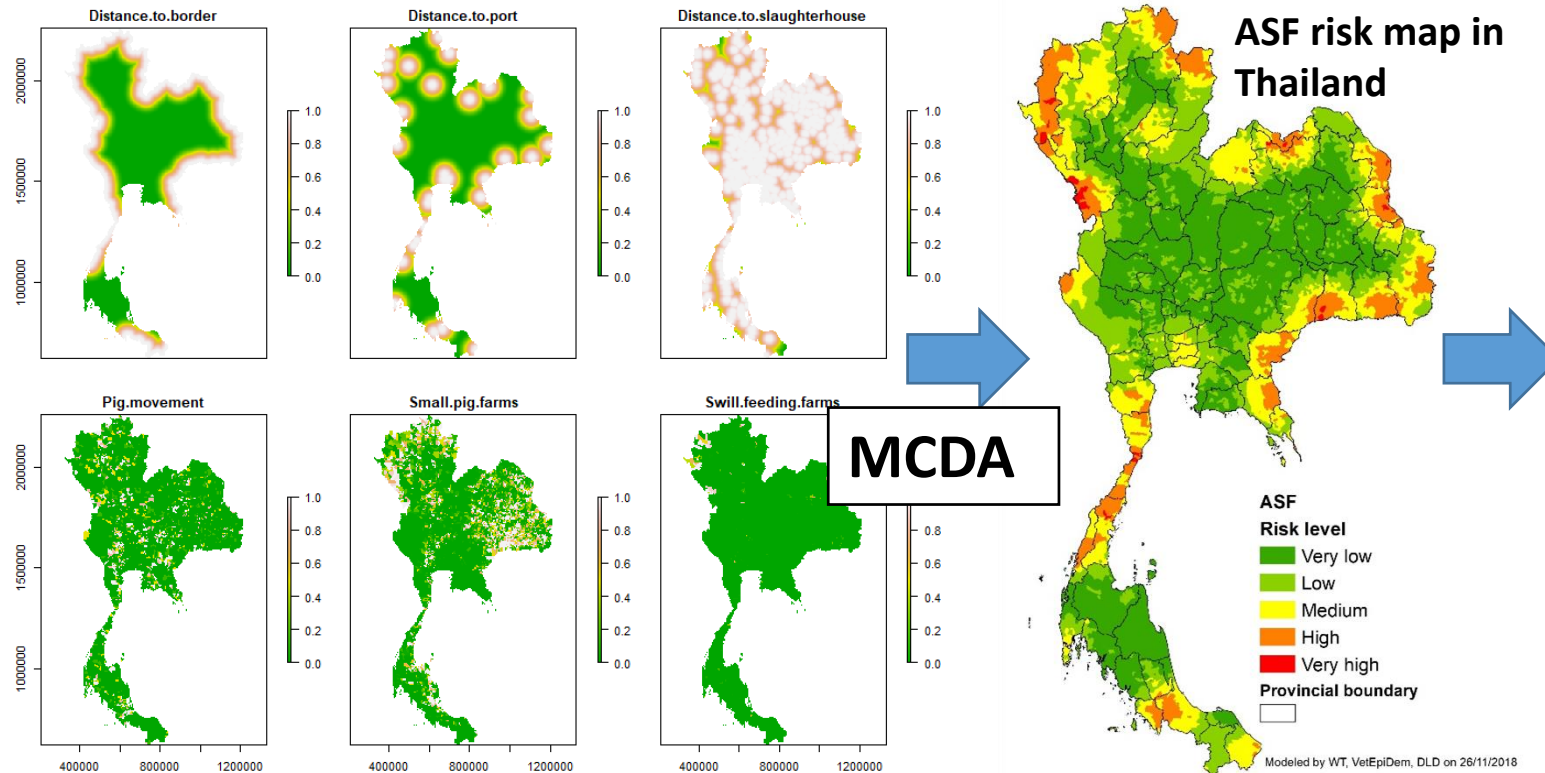

1. Implementation and management
2. Preventing disease introduction and spread
3. Farm biosafety
4. Disease surveillance
5. Laboratory network
6. Disease control
7. Risk communication
8. Recovery plan

**Have been implemented since the first report of ASF in China (August 2018)**

# Identification of risk areas of ASF in Thailand

**November 2018** : Risk map of ASF was produced

**Risk areas of ASF**

ASF risk levels	No. of Sub-districts	No. of Districts	No. of Provinces
Very high	7	5	4
High	317	100	28
Moderate	1,466	336	52
Low	2,161	417	69
Very low	3,465	486	55

- Risk-based surveillance
- Strengthening movement control of animals and animal products
- Farm bio-security improvement
