TIMOR-LESTE

Country report on the current situations of the use of antimicrobial agents as growth promoter

OIE Regional Workshop on Animal Feed Safety
15-16 January 2019, Tokyo, Japan

Mario Jose Morais
National Directorate of Livestock, Ministry of Agriculture and Fisheries
Legislation related to the use of antimicrobial agents in feed as growth promoter

• There is no particular legislation to regulated the use of antimicrobial agents as growth promoters in animals feed.
• The only legislation that we have are:
  ➢ Decree Government No. 1/2006, General Regulation of the Quarantine.
  ➢ Decree Law No. 10/2014, Regime for Licensing Abattoirs.
  ➢ Decree Law No. 11/2014, Regime for Identification, Registration and Circulation of Animals.
  ➢ Decree Law No. 12/2014, Restriction for Animals Movements in Urban Area.
  ➢ Decree Law No. 13/2014, Hygiene-sanitary on Transport Preparation and Selling Meats and Meats Products.
Current situation

• Banned to manufacturing, distributing, Importing and Exporting animals feed which contain antibiotics, hormone and inclusion of meat and bone meals in feed as growth promoter.
• On-site observation for animal feed production as a part of “Import Risk Analysis”.

OIE Regional Workshop on Animal Feed Safety
15-16 January 2019, Tokyo, Japan
Way forward

• Training, workshop and seminar.
• Public Awareness.
• Defining specific related legislation.
• Establishing Authority body and related installation (laboratory).
• Controlling.
• Monitoring and Evaluation.
