Achievements and future perspectives

Dr Elisabeth Erlacher-Vindel
Head of Antimicrobial Resistance and Veterinary Products Department

Kuala Lumpur, Malaysia
14-16 January 2020
OIE Data collection

Fourth round report: to be published February 2020

Fifth round: Please send data before the end of January. If you need more time, let us know!

If you have any specific question, please write to antimicrobialuse@oie.int.

We can set up a skype or zoom teleconference.

AMU DATABASE PROJECT started in June 2019. Project IT officer joint the AMR & VP Department. Contract with supplier supposed to be signed March 2020.
Up coming regional meeting:

OIE Regional Workshop on the Database on Antimicrobial Agents intended for use in animals in Asia and the Pacific
31 March - 02 April 2020
Bangkok, Thailand

Please kindly communicate the message to relevant authorities and save the dates
Pharmacovigilance

What is needed to start setting up a pharmacovigilance system?

- Clarification on responsibilities over veterinary medicinal products:
  - Who is responsible for registering?
  - Who can take action?
  - Who should receive information and to whom should it be transmitted?

- Is legislation needed before starting the process?
- What capacity/funding is needed?

Is the document provided on “how to set up a pharmacovigilance system” useful?
- Does it need adaptation?
Pharmacovigilance

“How to set up a pharmacovigilance system “

Focal Points from Africa already provided input following the trainings in 2019

Please provide comments on the draft document

Other regions will follow to have a consolidated version for final approval
The Tripartite workplan on AMR

AIM:
A dynamic Tripartite platform intend to make available in a user friendly manner on a global and regional basis validated and official data provided by countries to FAO, OIE and WHO on patterns and trends in antimicrobial use (AMU) and antimicrobial resistance (AMR) in humans, animals, food, plants and environment, while recognizing that different sectors may be at different levels of advancement

AMU in animals (OIE),
AMC on human (WHO),
AMC in plants (FAO),
AMR on human (WHO),
AMR in food, animals & environment (FAO),
ESBL Ec Tricycle (WHO).
Report of October 2019 meeting was sent to Delegate and Focal Points on 3 January

Other topics needing attention

- Legislation
- Feed
- Antiparasitic resistance
- Species specific approach
- Information from field level
- National treatment guidelines
- Partnerships
OIE Strategy on Antimicrobial Resistance and the Prudent Use of Antimicrobials
Please share the information and feedback with the Delegate and your colleagues back home!

Interaction between OIE and Focal Points shouldn’t be limited to Focal Point Seminars or the work on Antimicrobial use data collection!

We make progress – step by step at national, regional and global levels and need to tell it!
Networking

➢ Contact your colleagues

➢ Contact regional/Subregional Representation

➢ Collaborating Centers

➢ OIE Headquarters
  • AMR and VP
THANK YOU
