questions or less**

FREE to U of B

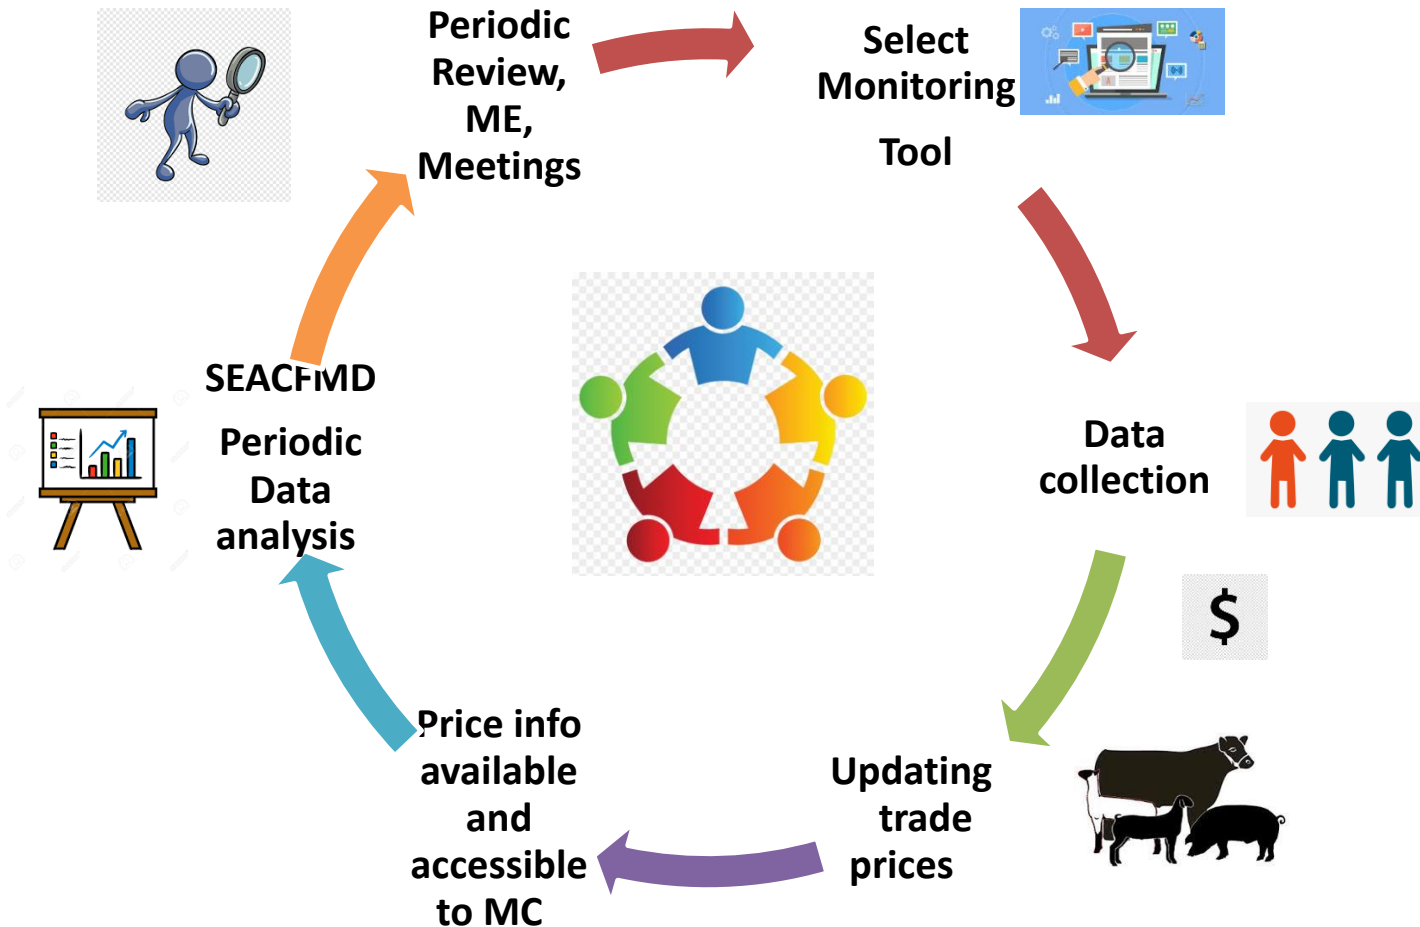

Objective

- To build a regional platform under SEACFMD to monitor the price of live livestock (selected species) and their meat.
- To share price information amongst member countries and analyze the data periodically.
- To estimate and identify price patterns or trends (if any related to cross border trade, TAD's including FMD)
- To explore the linkages between prices and animal movement to promote transparency and safe trade.
- To potentially anticipate changes in cross-border animal movement patterns
- To use technology which is freely available and user friendly.
- To encourage and support SEACFMD countries to develop similar price/data collection/investigation/ monitoring platform at country level.

The Sequence of the Flow Price Monitoring Tool (PMT)

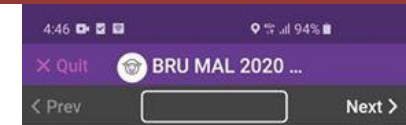

Epicollect5

Advantage:

- Multipurpose survey
- Web+App / user friendly
- Free/ options-public/private
- Access from any phone/Web browser
- Location (upload function Lat/Long)/Photo/Video/Audio
- Offload data (save entry-upload later)
- Local language support

	Questions	Structure
1	Country Name	*This field is required - Dropdown 12 country - One choice
2	Respondent name	*This field is required - Open typing
3	Date	-Selected from calendar
4	Currency	Selection USD
5	Live Cattle price per kg?	Open
6	Beef meat price per kg?	Open
7	Live Pig price per kg?	Open
8	Pork meat price per kg?	Open
9	Live Sheep/Goat price per kg?	Open
10	Sheep/goat meat price per kg?	Open
11	Location	Save entry- Upload data

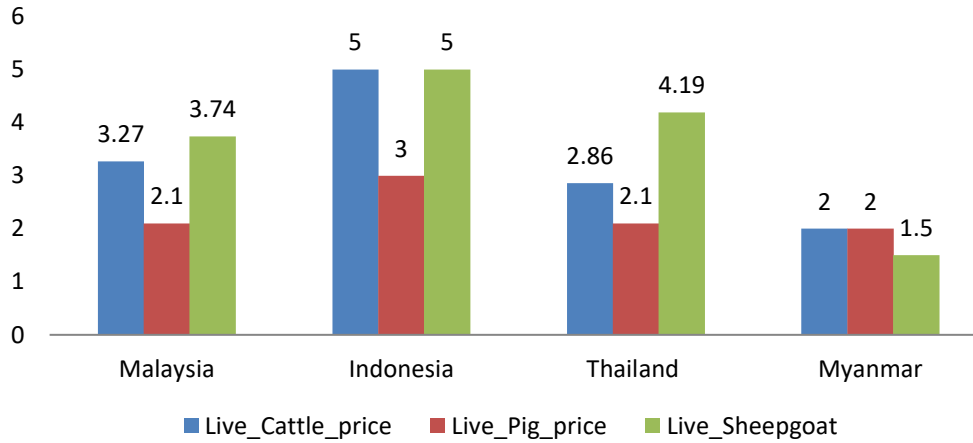

Demo website –view data

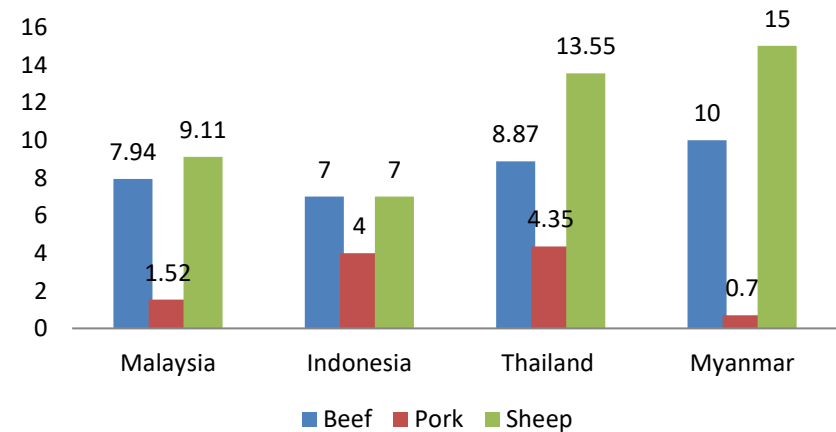

Live animal per kg

Meat price

Technical issue/Limitation

	Regional	National level
	Simple –User Friendly	
Data source	Member country/Single source data	<ul style="list-style-type: none"> - Market - Border area - Village
Data type	Average price per country (can not capture detailed info)	- Species. Age, breed, bodyweight, sex..
Entry person	Single person per country/ NC ?	<ul style="list-style-type: none"> - Trader/Middle man - Vets.... - Farmer
Frequency	Once a month?	Up to country
Variable/ Location	At national level (one entry per country) OR A selection of (up to 5?) key locations in which monitoring the prices is relevant. This will have to be pre-set.	A pre-set list of key locations/provinces/ markets/ slaughterhouses in which monitoring the prices is relevant. OR The GPS location of the collector at the time he enters the data.
Data quality	Essential for further analysis/ Result will be shared	
	Security level/ Adjustable	

Further steps /Coordination

- OIE SRR technical support/coordination
- Technical meeting for demonstration
 - Security management (Level of permission users)
 - Data management
 - Coordination management
- Pilot Project –in coming 3 months
- Feedback send out NCs /Discussion
- Prepare Proposal
- Propose SEACFMD Sub-Commission

THANKS FOR YOUR ATTENTION
