Project on

cross-border value chain analysis

1 project – 2 main objectives

1. analyse some animal cross-border value chains in targeted countries

2. support capacity building on value chain analysis in the Veterinary Services of these countries.
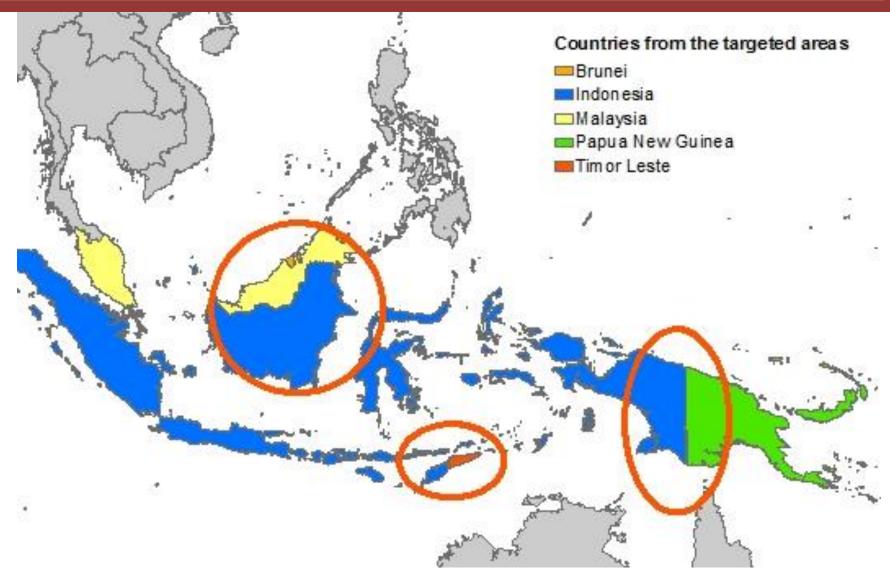

1 project – 3 geographical focus

1. Border between Timor Leste and Indonesia (Timor)
2. Border between Papua New Guinea and Indonesia (Papua)
3. Border between East Malaysia, Brunei and Kalimantan Indonesia (focus on poultry and large ruminants)

Targeted areas

Countries from the targeted areas
- Brunei
- Indonesia
- Malaysia
- Papua New Guinea
- Timor Leste

Main steps:

✓ Needs assessment

✓ Preliminary discussion with targeted countries

➢ Identify a consultant & confirm the interest of countries

1. Work plan

2. Methodology

3. Workshops and tutoring activities

4. Collection and analysis of data

5. Consultation

Involved countries' involvement

- Confirm their interest in participating

- Designate 2 staff from your office (preferably from central government and from the province(s) near the border) who will be considered as national experts to work with the OIE Consultant

- Commit time for this staff to support this project

- Provide the national team and the consultant with relevant information /data

- Facilitate the field mission (meeting with relevant persons, accommodations...)
